### What is eGlobal Family?

**eGlobal Family** links orphaned and vulnerable children in developing countries to compassionate and responsible supporters. Through the emotional and financial support of their foster parents, these children are afforded the opportunity to develop into more confident and self-reliant individuals.

### What is an eFoster Parent?

The eFoster Parent Program is eGlobal Family's unique way of reaching out to and providing emotional and financial support for vulnerable and orphaned children.

eGlobal Family matches children at partnering orphanages with a supportive foster parents. By providing just one email a month and a dollar a day, these "**eFoster Parents**" help their children gain confidence and feel loved, perhaps for the very first time in their lives.

### About The Foundation, Mukti-Mancha

**Mukti-Mancha Foundation** is a Bangladesh non-profit organization located in Abalpur Village, Magura City. The Foundation was established by Mohammad Rouf in 2005 with a dozen different major objectives, but centered on Mohammad's simple but powerful dream: that every child deserves a childhood and every child should be able to go to school.

In Bangla, **Mukti-Mancha** literally means "a stage for freedom." **Mukti-Mancha** is currently focused on its Education and Cultural Program, which now includes about 120 children. The children receive from **The Foundation**: book supplies, clothing, medical help, and tuition fees paid directly to the local school.

**The Foundation** identifies deserving students from primary school to university levels who are not in a position to continue their education due to financial hardships. The children live with their families and/or relatives, and they check with the Foundation office on a regular schedule to discuss their progress and needs.

**Mukti-Mancha** strongly believes that women need to be properly educated as they are future mothers, and therefore the most important building blocks of our societies. History has proven that illiterate mothers will likely raise illiterate and ineffective individuals. Alternatively, literate mothers will largely contribute to literate and effective individuals, contributing to effective and healthy societies.

Current items on the organization's wish list include the construction of separate buildings for a library, classrooms, and dormitories to enable some children to live at the facility.
